CAPABILITY STATEMENT

Supreme Gear Company has been providing creative manufacturing and assembly solutions to the Defense and Aerospace industries for 70 years. Our capabilities include precision machining of highly critical and complex gear, gear box, and powertrain components as well as precision machined structures and assembly components. Supreme Gear machines all types of gears up to 36" in diameter and in quantities from prototype and individual repairs to LRIP and to full production runs.

DIFFERENTIATORS

- Supreme Gear treats our customers as long-term partners.
- Supreme Gear combines state of the art equipment with practical, real world experience, from a seasoned work force.
- Supreme Gear manufacturers all gear designs and shapes over a wide range of dimensions for gearbox, speed reducer and powertrain assemblies.
- Supreme Gear has extensive experience machining carburized and hardened, nitro carb, and other heat treatments of aluminum, steel, steel alloys and exotic metals.
- Supreme Gear offers broad capabilities for metal finishing and on-site chemical processing including CARC paint.

MISSION STATEMENT

Supreme Gear and its employees are committed to providing our customers with a high quality, on-time product, at a competitive price. Supreme Gear treats each customer as a partner for our mutual success. Our quality system and customer service support must reflect to our partners that we recognize their importance and value their business.
